

Genesis Assembly Instructions

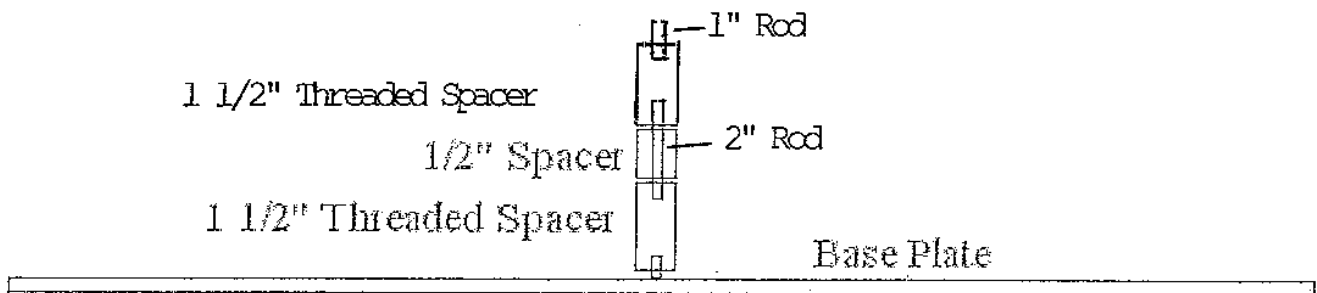

Preparation

1. Confirm that all the pieces are accounted for, and have been thoroughly washed in dishwasher.
2. You will want to begin by putting all of your cakes on matching pre-cut cake boards.

Center Post

1. Start by taking the 10" base plate (it has a small screw in the middle), and screwing on a 1.5" Threaded spacer.
2. Then take your 2" threaded rod and screw it down into the 1.5" threaded spacer.
3. Next slide your .5" non-threaded spacer down onto the 2" threaded rod.
4. Then screw another 1.5" threaded spacer onto the end of the 2" threaded rod.
5. Last, screw a 1" threaded rod into the top of the 1.5" threaded spacer. It should look like this.

CENTER POST EXAMPLE

6. Take your 8" cake plate and put it onto the center post. Then screw in your next 1.5" threaded spacer to secure it in place.
7. Repeat, building up your next center post the same way as the first.
8. Place your 6" cake plate on top of the second center post. Then screw down the last 1.5" threaded spacer.
